PUPIL FREE DAY -  
31/05/19

FIRST HOLY  
COMMUNION MASS -  
23/06/19

## WELCOME BACK

Welcome back everyone to an exciting Term 2. I hope everyone is well rested after the holidays and are ready to learn. We've got a jam packed term, which I am very excited about.

### English -

In writing this term, we are starting off looking at Poetry. The students will create their own poetry portfolio with 10 different types of poems in there. I hope everyone is ready to get their creative juices flowing.

### Art -

In Art we will be exploring the use of line, colour and shapes within a piece of art.

### Health -

In Health, we will be exploring situations and how they may make us feel. We will look at ways we can remain safe, and different things we can do to help ourselves.

### **Maths -**

In Maths, we are covering several different concepts, explained below.

#### **IMPROPER FRACTION -**

Understand and convert between fractions and mixed numbers using number lines and diagrams.

#### **SUBTRACTION MENTAL STRATEGIES -**

Explore and choose appropriate mental subtraction strategies such as the compensation strategy and rounding to solve subtraction problems.

#### **TIME -**

Investigate and record am and pm time to the minute. Convert between common units of time.

### **Religious Education -**

Throughout the first 5 weeks of term we will have a strong focus on the Eucharist. Students will be taught the meaning of Eucharist and what it means to receive their First Eucharist.

### **Digital Technologies -**

Through digital technologies we will be looking at how technology has changed over time. We will compare technology past and present. We'll then explore what a digital system is and how to use software.

If you would like to contact me about anything please feel free:

**"Strive for  
progress not  
perfection."**

### **History -**

In History, we will be looking at different explorers, and researching information about their lives.

### **PBL -**

In PBL we will continue working hard to complete our final project.

### **Homework -**

A new homework booklet has been sent home with your child. These will be completed the same way as last term, which means they are sent home on a Monday and not expected back until Friday. There are additional math questions in the booklet this term, and the students will be told what these questions are at the beginning of the week.
